These devices now typically come with only 2 USB-C ports, so students may want a USB-C hub such as: <https://www.amazon.com/dp/B07ZVKTP53> so they can connect to an external monitor or mouse and keyboard.

We recommend a 3-year support plan that includes accidental damage. Drops, spills and screen cracks do happen. While at NEC, students will have access to an Office 365 subscription. However, NEC does not offer anti-malware to students. We recommend a behavioral-based anti-malware that protects the device from the latest exploits. You may already have a family plan for a number of devices (if not, something I would strongly consider). If you order from Dell, you can include a subscription to McAfee LiveSafe as an add-on.
